

EASY
(30 LB Helve Hammer)
#1-417 (1902-1926)

T H E E A S Y

Triphammer

This is a first class helve hammer, strong, durable and simple in construction, is suitable for drawing out plow lays and will handle the welding and forge work met with in the general blacksmithshop. Will weld iron up to 1½ inches square. The connecting rod is fitted with means of adjustment that will allow the range of work to be increased so that the hammer can be used on iron up to 6 inches in width.
