**MOTOR DRIVE
EQUIPPED WITH
MINING MACHINE BIT DIES**

BECAUSE —

MAYER POWER HAMMER is backed by thirty years experience in hammer building and neither expense nor intelligent effort has been spared to produce the best.

BECAUSE its design is mechanically correct and only the best materials are used in its construction.

BECAUSE it is simple and can be operated under perfect control with very little effort.

BECAUSE chances of breakage are reduced to a minimum and all parts subjected to wear are accessible and can be replaced quickly and easily.

BECAUSE although it will handle a large range of work without adjustment, adjustment for different thicknesses of dies and material is convenient.

BECAUSE MAYER POWER HAMMERS are GUARANTEED absolutely against defective material and workmanship. They are GUARANTEED to give SATISFACTORY SERVICE.

“WE’LL SAY IT IS”

I can heartily recommend the Mayer Power Hammer for its ease of operation, mechanical perfection and quality of its work. The way it has acquitted itself in my shop during a heavy season's run, together with my knowledge of other hammers, justifies me in recommending the Mayer.—J. E. Prout, Morland, Kansas.

I have been using the Mayer Power Hammer on country work with good success, and have had no trouble with any part of it. I have used five different makes of hammers but the Mayer has them all beat. I am here to say that the Mayer is the most simple and the best service giving hammer made.—A. Peterson, Media, Illinois.

The Mayer Hammer is O. K. I do farm work and it gives me no trouble and is always ready when I need it. I would not take what I gave for it. I like it better than the Mayer is good enough for me. All parts are alright and I haven't a kick or a knock on Mayer Power Hammer.—A. W. Parker, Dawson, Texas.

Our Mayer Power Hammer is perfectly satisfactory in every way. Have used several other makes. We like this better than any other we have used. Had no trouble whatever.—Parson and Grodit, Clark, S. Dak.

The hammer works to our entire satisfaction, I class it far superior to any other make which we have used. Providing we are in the market for another hammer we would purchase the Mayer.—The Forged Products Co., Champaign, Ill.

Mayer hammers are the best on the market. I have worn out one and thought it was the best I ever seen, but the Mayer hammers have it beat in every way in the world.—Ed. Thompson, Hollis, Okla.

—and so do hundreds more
